

Knowledge that will change your world

**MEMORANDUM**

**Date: February 8, 2021**

**To: State Finance Director**

**From: Sue Feldman, RN, MEd, PhD, Principal Investigator, GuideSafe program**

**Re: GuideSafe™ Tools Program Progress Report as of January 31, 2021**

The GuideSafe™ Tools Program includes GuideSafe™ Healthcheck, GuideSafe™ Event Passport and GuideSafe™ Exposure Notification.

**As of January 31, 2021:**

**GuideSafe™ Healthcheck** has over 250,000 daily users across K-12 and higher education in Alabama. While many K-12 districts and all higher education have implemented GuideSafe™, cases have increased in Alabama. Since our last report, we have added another private K-12 school.

**GuideSafe™ Event Passport** is accessed for K-12 school entry and university classroom entry across Alabama. Since the passport is accessed several times daily across a variety of events, it is difficult to ascertain how many times this has been used; however, the passport can be accessed by the same 250,000 plus daily Healthcheck users. We have developed a Visitor Passport that is actively being used by Universities to control visitors, such as vendors, prospective students and faculty, etc., on campus and to mitigate community spread on campuses.

**GuideSafe™ Exposure Notification** has increased downloads to over 224,000 with over 1100 confirmed positive tests. In December, we moved development of the GuideSafe Exposure Notification app out of UAB to our partnership with PathCheck Foundation out of MIT. The final version of this updated app is scheduled for release on Monday, February 8, 2021. This development will include many updated features to keep our app aligned with others in the nation and the world that have developed off of the Google/Apple platform.
